

Park Loop Trail Connection

This part of the Trail Master Plan will connect Squires to North Colony Blvd. There are two sections of trails; the first section begins at the west section of Squires and travels along the drainage channel and connects to Vaden St. and then to the trail along Taylor St. The second section begins at the intersection of Squires St. and Taylor St. across from BB Owen Elementary School and travels south, bridging over the drainage channel and along the gas easement to the west side of the fire station making the connection to the Park Loop Trail on the south side of North Colony Blvd.

This project is currently in the design phase.
